**Christopher Roberts : Deliverance** before purchasing it in order to gage whether or not it would be worth my time, and all praised Deliverance:

About Deliverance No one was more surprised than I was when God placed it on my heart to write a book about deliverance. However, after seeking God about writing such a book, I wrote this particular edition entitled 'Deliverance'. I have based the contents of this book on both the theory and practice of deliverance. Therefore, some of the chapters provide the theory that people will need to help them engage in spiritual warfare, while other chapters will consider my own personal and practical experience relating to casting out devils. I have no doubt that the contents of some of these chapters will shock you; you may even find it hard to believe that what I share with you actually happened. But the reason why some people will be shocked at the contents of this book is because some Christians have never involved themselves with spiritual warfare on such a level. And, because some Christians are afraid of deliverance, they have presumed that such experiences have been relegated to the land of make-believe. But this is where the Devil has lied to people, making them think that the contents of this book are fictional. But I've got news for you! Jesus is alive, and so are the Devil and his demons. I have heard so many people tell me that Christ did it all at the Cross, and there is no need for Christians to do any more. Jesus did die on the Cross, but that does not mean we stop preaching, praying for the sick, and casting out devils. Fear is at the heart of those who suggest that Christ did it all at the Cross; therefore, there's no more for us to do, particularly when it comes to casting out devils. However, for those who need the help of this book, I pray that God will lead you by his Holy Spirit, so that you may discover a new freedom and authority in Christ Jesus. Some names in this book have been changed, to protect the privacy of individuals.
